## DETAILED ACTION

### *Claim Objections*

1. Claim 25 is objected to because of the following informalities: it is noted that claim 25 is depend on **the canceled claim 21**. Applicant is required to cancel the claim or amend the claim to place the claim in proper dependent form. Appropriate correction is required.

### *Allowable Subject Matter*

2. Claims 22-24 are allowed.

The present invention is directed to a method for providing a user interface for processing a video program including encoded digital packetized data representative of a sequence of individual images. Independent claim 22 identifies the uniquely distinct features “generating a user menu from pre-formed menu elements comprising an inactive menu icon, wherein video manager information and program chain information corresponds to said user menu” and “updating said video manager information and program chain information with data indicating the association of said active user command to said inactive menu icon”. The closest prior art, Brodersen et al (WO 99/38098) discloses conventional DVD player, either singularly or in combination, fails to anticipate or render the above underlined limitations obvious.

3. Since this application is in condition for allowance except for formal matters (objection of claim 25), prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 935 C.D. 11, 453 O.G. 213.
